

## SOUTHEAST LOUISIANA CLEAN FUEL PARTNERSHIP

PUTTING THE PIECES TOGETHER FOR CLEANER FUEL  
A STRONGER ECONOMY - A HEALTHIER COMMUNITY

The Southeast Louisiana Clean Fuel Partnership (SLCFP) is an initiative of the U. S. Department of Energy to promote clean transportation fuels and technologies that can greatly contribute to our energy independence. The goals of the SLCFP are:

- Provide support and project coordination for fleets interested in transitioning to cleaner fuels;
- Create partnership between producers, distributors, retailers and users to increase the availability of cleaner fuels and technologies; and
- Educate our stakeholders as to current trends and opportunities.

### **What We Do:**

- Coordinate project implementation
- Provide recommendations based on fleet, infrastructure, and needs, including economic feasibility
- Assist in procuring finances
- Connect interested fleets with reputable alternative fuel/technology providers
- Provide education on the various aspects of clean transportation fuels and technologies
- Provide information on the latest legislation and local events relating to alternative fuel vehicles and alternative fuels.
- Offer test drives in alternative fuel vehicles.
- Provide contacts with fleets that are using alternative fuels.
- Give information on professional conferences dealing with alternative fuels, vehicles and fleets.

### **Who We Do It For:**

- Public and Private Fleet Managers and Maintenance Personnel
- Service Station Retailers
- Fuel, Vehicle, and Technology Producers and Distributors - Alternative & Traditional
- Legislators and Public Officials
- Universities and Research Groups
- Health Organizations
